Dear Princetonian,

Welcome back to Old Nassau!

There's no better way to celebrate being a Princetonian than returning to campus for Reunions. Your Class and APGA Reunion Chairs, along with volunteers from dozens of alumni organizations and departments, have once again created a memorable weekend, as you will see from the program contained in this booklet. We hope that your visit with friends and classmates here on campus will be meaningful and memorable.

As President of the Alumni Association, I have had the opportunity to travel with our 19th President, Shirley M. Tilghman, to town meetings and regional conferences and to meet many of you in your regions. At these gatherings, President Tilghman has spoken openly and earnestly about her goals and vision for Princeton. I hope that over the course of this weekend you will get a chance to see just how well Princeton continues to flourish under her leadership.

I encourage you to sample the intellectual fare of the many fine Alumni Faculty Forums and panels sponsored by the Alumni Association, departments, and the major reunion classes. On Friday morning, Dean of Admission Janet Rapelye will host an information session on navigating the college admission process for high school students and their parents. Those alumni interested in leveraging the Princeton careers network are invited to a half-day careers conference on Friday afternoon titled "Permeable Boundaries." President Tilghman's annual "Conversation with Alumni" will be held on Saturday morning in Richardson Auditorium. And, of course, on Saturday afternoon there's the one and only P-rade, followed in the evening by a concert and fireworks on Finney and Campbell fields near the Princeton Stadium.

I welcome you back to Princeton and salute the many alumni leaders and volunteers who have worked so diligently to make this reunion possible for all of us.

Have a wonderful weekend.

Linda Francis Knights '77

A World of Legal Conflicts: Multiple Norms in the International System

Continue your education at Princeton at this Conference for Continuing Legal Education Credit. As globalization has transformed an increasing number of activities, the law has struggled to keep up with the changes. In daily practice, multiple laws may apply. Or, one law may apply, but there are different normative claims arising from the clash of cultures. These non-legal claims jockey for recognition along with (or instead of) formal law. What is a lawyer to do? Our day is organized around four topics: 1. The Quandary of Culture Property: How do museums cope with the new legal world in which artwork acquired through legitimate auction houses is suddenly claimed by its country of origin? 2. Moveable People, Immovable Borders: As people move around the globe (some legally, some illegally), how does law track their movements? 3. Multinationals in a World of Nations: How do corporations cope with the multiplicity of national regulations that complicate their daily operations? 4. International Law and National Change: How are international norms used by national "norm entrepreneurs" to achieve domestic change? Each of our panels features both lawyers with practical experience in sorting out these conflicts and social scientists who have researched the informal norms. We aspire to go beyond law to consider the complex questions of ethics and cultural difference. There is a CLE credit fee for alumni and non-alumni lawyers. The event is free for all who don't need CLE credit, but RSVP is required. For more information, call (609) 258-5626 or see lapa.princeton.edu/legalconflicts.php. To 6:30 PM. Chemistry Talk: The Chemistry of Chocolate

By Stefan Bernhard, Assistant Professor of Chemistry. What is it about chocolate? No other food rivals its ability to tantalize and tempt us, and it is said that chocolate is a surrogate for love, a gift provided to us by the Aztec gods. This lecture will initially explore the procedures that transform the fruits of the cocoa tree (*Theobroma cacao* L.) to the chocolate products available today. A great deal of science and engineering is necessary to process the cocoa beans to control the texture and flavor of the final product. The macroscopic properties of the complex mixture that is chocolate will be related to the molecular structure of its ingredients. Later we will explore the active components, such as theobromine, that are responsible for the stimulating properties of cocoa products. Are there negative health effects related to chocolate? Is there really "death by chocolate"? To 3:30 PM. Sponsored by the Department of Chemistry. *Frick Laboratory, Kresge Auditorium (Room 120).*

Physics Department Reunion Talk: String Theory and Strong Interactions

By Igor Klebanov, Thomas D. Jones Professor of Mathematical Physics. String theory was originally invented in the late '60s to describe strongly interacting particles: protons, neutrons, pi-mesons, etc. But in the '70s it was not string theory, but rather quantum chromodynamics (an example of so-called "gauge field theory") that emerged as the precise description of strong interactions. Luckily, a quarter century later it was understood that string theory and certain gauge theories are simply two sides of the same coin. These developments, in which Princeton physicists played an important role, have created what is currently one of the dominant areas of research in string theory. The talk will review some of the basic concepts in the relations between string theory and gauge theory. A reception will follow the talk in the Brush Gallery. To 4:00 PM. Sponsored by the Department of Physics. *McDonnell Hall, Room A02.*

Alcohol Policy at Princeton University

The University alcoholic beverage policy is designed to be consistent with the laws of the State of New Jersey and also reflects the need for mutual respect and personal responsibility within a diverse community.

The University and Borough Prohibit:

- Possession of a container of alcohol by persons under the age of 21.
- Serving of alcohol to persons under the age of 21.

The State of New Jersey has very strict laws concerning driving under the influence of alcohol and drugs. Persons found guilty of DWI charges are subject to substantial penalties, including fines and imprisonment. In addition, the Borough of Princeton prohibits the transporting of open containers of alcohol in public places, such as streets and sidewalks (including Prospect Street). Computing Resources

During Reunions weekend, OIT provides Internet connectivity to all visitors on campus using wireless networking services. OIT Visitor Wireless requires no registration and is free of charge.

Wireless Networking

Many areas of the campus offer wireless networking. These areas include all dormitories and the Graduate College, central campus from Firestone Plaza to Alexander Beach, the café in Frist, the grassy lawn outside the Frist eating area, several rooms in Firestone Library, parts of the Friend Center, and Scudder Plaza (the fountain area in front of Robertson Hall). Note: A limited number of wireless cards are available for checkout at the Frist Welcome Desk. A printable map that shows wireless coverage on campus can be found at: www.princeton.edu/wirelessmap.

Connecting to the Network and Configuring Your Computer

Please note that if your company uses a private intranet network, you may not have access to it. Check with your local technical support consultants prior to coming to Reunions for information about gaining access to your company's computing resources from the Princeton network.

Windows Computers

- Click on the Start button
- Pull up to Connect To → Show All Connections (in Windows 2000 or XP using the classic interface, pull up to Settings and select Network Connections)
- Right-click on the Wireless Network Connection and select View Available Wireless Networks
- Select puvistor from the list of available wireless networks
- Click the OK button

Mac OS X Computers

- Open the Applications folder
- Open the Internet Connect utility
- Click the Airport icon
- Select puvistor from the network pulldown menu

Troubleshooting—Are You in a Wireless Service Area?

Be sure you are in an area of the campus served by Visitor Wireless.

- Windows computers: Click on the Start button
- Pull up to Connect To → Show All Connections (in Windows 2000 or XP using the classic interface, pull up to Settings and select Network Connections)
- Right-click on the Wireless Network Connection and select View Available Wireless Networks
- Do you see a wireless network named puvistor? If you can, then Visitor Wireless is available in your location. If you cannot, make sure that wireless connectivity on your computer is enabled.

Getting Help While On Campus—Contact the Help Desk!

The OIT Help Desk at helpdesk.princeton.edu/kb/display.plx?id=3338.

OIT is open for telephone support, 24 hours, 5 days a week. To speak with a Help Desk consultant, call 8-HELP (4357) and press option #1.

Computing Facilities Available During Reunions

There are several computing facilities ("clusters") available for your use during the Reunions weekend. These machines will have a special Reunions configuration and will not require you to log in. You can simply visit one of the facilities listed below and gain access to the Internet. You can use these computers to check your e-mail (provided you have a Web-accessible e-mail interface), browse the Internet and use Microsoft Office.

Reunions Computer Clusters Will Be Located as Follows:

- McCosh B59
- Friend 005, 007 and 009
- 1901 Cluster
- All OIT workstations in Frist

For more information on software and platforms available in these clusters, please see: www.princeton.edu/clusters.

Your Responsibilities

It is especially important that the computer you attach to the campus network operates in such a way as to not interfere with the effective performance of the network. Because these devices will not be registered in the Princeton University Host Database, OIT will be unable to identify and notify their owners in the event they operate in ways that interfere with the campus network. This could make it difficult to address problems and restore network service to the rest of the campus in a timely fashion. You can help minimize such problems by ensuring that the computer you bring to campus has all current security and definitions updates installed, is properly secured against intrusion, and has current antiviral software. In particular, you should not attach DHCP servers to the campus network. While you are a customer of Princeton University's network, you are expected to abide by the University's information technology policies, available online at <http://www.princeton.edu/guidelines>.

Lightning Storms: Emergency Preparedness

Lightning is the second leading cause of direct weather deaths in the U.S. (after floods) and results in more fatalities each year than tornadoes and hurricanes combined. Given the random nature of lightning strikes, absolute protection cannot be guaranteed to any individual or group. Individuals are ultimately responsible for their personal safety and should take appropriate action when threatened by lightning. Adults must take responsibility for the safety of children in their care during thunderstorms. However, awareness of certain lightning safety guidelines can greatly reduce the risk of injury or death.

1. Identify in advance a location (e.g., building, bus, personal automobile) that would be safe during a thunderstorm. Locations that offer little or no protection from lightning include tents, golf carts, or open shelters, such as parking garages. Recommended locations for Reunions participants include dormitories of headquarters sites, Alexander Hall, the University Chapel, and the Frist Campus Center.
2. Public Safety will notify your reunion if a bad storm is expected and if evacuation of the headquarters site is recommended. When you first see lightning or hear thunder, go to the safe location immediately. Lightning often precedes rain; so don't wait for the rain to begin before suspending activities.
3. If you are caught outdoors, avoid high ground, open spaces, and water. Avoid all metal objects including electrical wires, fences, machinery, motors, and power tools. Avoid standing under Reunion tents; while they provide protection from the rain, they do not provide protection from lightning. If lightning is striking nearby when you are outside, you should:
 - a. Crouch down and put your feet together. Place your hands over your ears to minimize hearing damage from thunder.
 - b. If part of a group, spread out. You should avoid being in close proximity (minimum of 15 ft.) to other people.
4. Suspend outdoor activities for at least 30 minutes after the last observed lightning flash or thunder clap or until your reunion receives the "All Clear" message from Public Safety.
5. Persons injured by a lightning strike do not carry an electrical charge and can be handled safely. Apply first aid procedures to a lightning victim if you are qualified to do so. Call 911 or send for help immediately.

Lost and Found

If you discover you have lost an item over the weekend, please check first with the student crew at your major reunion headquarters. Shortly after Reunions, lost and found items will be moved to Public Safety and registered. You can check with the Public Safety Office regarding your item at 609-258-1000.

Medical Services

We are fortunate to have large numbers of people in attendance at Reunions and medical emergencies both large and small can be expected. If you or a companion need assistance, medical help is available for bee stings, cardiac symptoms, or anything in between. Please check at your major reunion headquarters site, program your cell phone to 609-258-3333, or dial 911 from any blue light or campus phone. Dialing 911 on a cell phone goes to Mercer County for routing and significantly slows emergency response time.

Orange Key Campus Tours

Thursday and Friday	10:00 AM, 11:00 AM, 1:30 PM, and 3:30 PM
Saturday	10:00 AM and 11:00 AM

All entrances to the University will be closed to vehicles during Reunions. To access our campus shuttle, park cars in Lot #16, #23, and #23A on the lower end of campus. Overflow will be in Lot #21, next to Jadwin Gym.

P-rade!

The one and only P-rade begins at 2:00 PM on Saturday. Alumni, spouses, and their children are welcome to march.

Be sure to check the P-rade map in your *Princeton Alumni Weekly* issue, or on posters at your major reunion headquarters site and around campus for the route and staging area for your class. Special orange signs will also be posted along the route—or you can look for your classmates in their reunion costumes. This year's finale will be on Poe-Pardee fields. Parents of members of the Class of 2007 are encouraged to sit on the bleachers reserved for them at the Poe-Pardee finale for the best views and photos. At the end of the route, please help keep the P-rade moving!

Here are some additional suggestions that could help your major reunion win this year's Class of 1945 P-rade Trophy:

- Get to your staging area by 1:45 PM.
- Wear your reunion costume.
- Keep up with your class! Follow the banner and keep up with the people in front of you.
- Carry very young children or use a stroller.
- Keep moving while you are cheering the reunions along the way and at the Reviewing Stand.

Public Safety

The Public Safety Office is located at 200 Elm Drive and can be reached at **609-258-1000**. Emergency calls can be made from any blue light campus or wall mounted emergency phone, by pressing the red emergency button, or by pressing 9-1-1. **If making an emergency call for a campus emergency from a cell phone, dial 609-258-3333.** Dialing 911 on a cell phone goes to Mercer County for routing and significantly slows emergency response time.

Sculptures by Joseph Brown: “Celebrating the Harmony of Sculpture and Education”

This exhibit features the sculptures of Princeton University Professor Joseph Brown—teacher, coach, and friend. The exhibit represents Brown’s career from his early years, his time at Princeton from 1937 to 1977, and his time after Princeton up until his death in 1985. On display will be some of his most noted sculptures: Monument to Freedom of Expression (1951), Jesse Owens (1942), Boxers (1943), the models for his 16-foot Veterans Stadium sculptures (1970–1975) along with his many athletic figures, female figures, clown figures, portrait busts, and medallions. Even if you have never had the opportunity to meet Brown, he represents a wonderful part of Princeton’s history. Make it a point to stop by and be amazed at the magnificent sculptures created by him.
